From

N.C. Thomas, Esq., B.A.,
Joint Secretary, Board of Revenue.

V.N. Kudva, Esq., I.C.S., Commissioner of Land Revenue, Excise and Prohibition.

ASSISTANT SECRETARY
D
8 MAY 1949
PUBLIC WORKS DEPARTMENT

Read: Board's Reference H.80/49-2 dated 21-1-1949.

From the Collector of South Kanara Ref.C.No.B7.11909/48, dated 20-4-49.

Ref: Board's L.Dis.Z.H.6195/47 dated 31-5-48 and Ref. H.80/49-3 dated 4-4-49.,

...

The following were the four irrigation schemes referred to in the Board's reference cited first above whose investigations were in progress as reported in this office Ref.C. No.B7.8283/46 dated 18-5-48.

1) Kudarbettu dam across the Mulky river in Mangalore Taluk
2) Mundkur dam across the Mulky river in Mangalore Taluk
3) Water course in Chervathur village, Kasaragod Taluk and
4) Augadinegou dam in Kasaragod taluk.

2. Of these schemes the investigations in respect of items nos. 1, 2 and 4 have since been completed by the E.E., S.Kanara. There is already a dam at Palinar across the Mulky river annually constructed by the ryots themselves and the E.E. has reported that it is not possible to have irrigation under an additional dam from the same flow of 13 cusecs of water in this river for irrigating II crop and that it is not advisable to have any other dam except the mamool Palimar anicut across the Mulky river. Here I may also invite a reference to Board's Rt.No.1300 dated 8-3-49 in which the Board has recommended to the Government that in view of the pending civil litigation over the construction of a dam at Mundkur, no initiative need be taken by the Government either to allow the dam or to demolish it. As recommended by the Executive Engineer the scheme in item Nos. 1 and 2 will therefore be dropped for the present.

3. Regarding item 4 the Executive Engineer has reported that there will be no flow during II crop, when the Shiriya anicut at Dadur which is already under execution and shiriya anicut at Bombrana, the investigation of which is nearing completion are put up. He has, therefore, stated that the Augadimogru dam is also not feasible and it will also be accordingly dropped.

4. I have not yet received a final report from the Executive Engineer regarding the scheme in item No.3. I am reminding him and a further report on this scheme will be sent as soon as his report is received.

Sd. xxx
for Collector, S. Kanara.

Copy of D.Dis.11909/48, dt. 27th April, 50, from the Collr. of S.Kanara to the Secretary(F.P), Madras.

IRRIGATION - S.Kanara Dt. - Provision of Irrigation facilities - Further report - Submitted.

1) Bd.'s L.Dis. Z/A-6193-47, dt. 21-5-48 and Ref.H.80-49-3, dt. 4-4-49.
2) This office Ref.C.No.11909/48, dt. 20-4-49 and 10-9-49
3) Bd.'s Ref. No. H.80/49-7(F.P.II) dt. 7-10-1949.
4) This office Ref.11909/48 F. p.1, dt. 1-12-49.

-.-

In reply to the Board's reference first cited, the follcwing 3 irrigation works were recommended to be dropped for reasons stated in this office reference second noted above.

1) Kudar bettu dam across the Mulky river.
2) Mundrur Dam across Mulky River.
3) Aregadimoru Dam in Kasaragod Tk.

In the same reference it was stated that a separate report would be submitted, so far as construction of a reservoir across the water course in Chervathur village of Kasaragod Tk. was concerned.

2. In the Board's reference third cited, I was asked to examine the possibility of putting up temporary bund across the channel in question by giving encouragement to the ryots concerned in the shape of subsidy. The attempts made in this direction did not fructify.

3. In the meanwhile, the Executive Engineer, S.Kanara Division conducted preliminary investigation to construct a permanent reservoir and has since submitted his report to the Superintending Engineer, Coimbatore. I have offered my remarks on the revenue and administrative aspects of this proposal, in my D.Dis.28272/49, dt. 11/4/50 in which I recommended taking up of detailed investigation. A copy of my report is enclosed for favour of Board's perusal. I request that further action may be ordered to be taken at an early date.

/True Copy/ Sd.xxx
for Collector.

Copy of Collector's D.Dis.28272/49, dt. 4-4-50, to the Superintending Engineer, Coimbatore Circle.

IRRIGATION - S.Kanara Dt. - Grow More Food campaign Provision of ~~irriga~~ tion irrigation facilities - Hosdrug Sub Taluk - Timiri Reservoir Scheme - Administrative and Revenue aspects - Reported.

1) Letter No.S.E. dt. 24/10/49 of the Executive Engineer, S.Kanara.
2) Letter No.494, S.E. dt. 1-3-50 of the S.E.South Kanara.

I offer my remarks on the revenue and administrative aspectics of the above scheme as here below:

2. Revenue Aspects. The scheme consts of a construction of a reservoir by building a dam across the Kutat Thodu in Thimiri village of Hosdrug Sub Taluk. It is expectad that this reservoir will bring under second crop an extent of 1063 acres of land in Thimiri and Chervathur villages. This extent includes Wet I class II Class ard III Class lands as particularised in the statement of Ayacut Particulars, furnished in the letter of the Executive Engineer, S.Kanara second cited.

2. The levy of water rate of Rs.6/- per acre is proposed by the Executive Engineer. This is not in vogue so far in this district. The Resettlement Notificati n of this date does not make any provision therefor. Moreover, its levy at a flate rate as proposed by the Executive Engineer on all classes of lands, may not be fully justifiable. For, the assessment on Wet I and II class lands which are double crop lands, include the charge for second crop also. I am therefore not in favour of this proposal.

4. On the other hand, I propose to enhance the rate of revenue by changing the classification of lands. This is permissible under the provisions contained in para 40 of the Resettlement Notification. Only the sanction of Government is necessary. On this basis an annual additional re against an ar[illegible]

Executive Engineer. The difference is therefore very little.

5. In addition to the above additional revenue of Rs.3500/- (roughly) I expect to collect a betterment fee of Rs.76,300/- (roughly) as detailed below:

Class of land.	Extent.	Rate.	Amount.
	A.C.		
Wet I class	200/-	Rs.50/-	Rs.10,000/-
II "	800/-	75/-	60,000/-
III "	63/-	100/-	6,300/-
			Rs.76,300/-

6. Administrative Aspect. It is evident that the scheme is not a remunerative one. It is therefore eligible for the subsidy from the Union Govt. to the tune of Rs.16,79,800/- approximately (separate working sheet enclosed). The share of the State Govt. is roughly Rs.16,00,000, after deducting the betterment fee. Prima facie, the scheme appears to be not encouraging from the financial point of view But there are other considerations which impell me to recommend the scheme.

7. Hosdrug Sub-Taluk, especially Chiravathur, Thiniri and the villages roundabout, is a Communist ridden area. One of the main reasons for the spread of communism here is the object poverty of the agricultural and Working classes. The scheme if it materialises will better their lot. In fact the annual increase in wealth among these classes in this area, will be Rs.1,75,000/- which is the annual value of additional food grains that will be produced on account of the execution of the scheme (i.e. 500 tons of rice @ Rs.350/- per ton). This will to some extent have a steadying effect on the local kisans who are increasingly learing towards Communism. Apart from this, the ~~direct-on~~ district on account of its physical features does not hold much prospect for large scale irrigation projects and it would be a disappointment to the poor ryots if the construction of even small works like this is not undertaken by Government to ameliorate their condition. S.Kanara is a deficit district Hosdrug Sub-Taluk which the scheme will benefit is highly deficit pocket of this district. In view of these facts and in view of the value of the scheme I recommend that the detailed investigation may ordered immediately so that the scheme may become a fait accompli in near future.

No. 2671/50 B.25 dated 16-4-1953.

Sir

Sub: Irrigation - South Kanara District - Hosdrug Sub Taluk - Timiri Village - Timiri Reservoir Scheme.

Ref: Govt. Postcopy of Telephonic message No. 90.J/49-2 P.W.D. dated 4-4-1953.

An estimate amounting to Rs. 61,37,250/- for works or Rs. 79,78,715/- inclusive of direct and indirect charges together with a preliminary report for the formation of a reservoir by building a dam across the Kutat thodu in Timiri village of Hosdrug Sub-taluk of Kasargod Taluk, South Kanara District to bring under second crop cultivation an extent of 1060 acres in Timiri and Cheravathur villages has been received from the Superintending Engineer, Coimbatore. The Collector of South Kanara to whom the proposal was referred to, does not recommend the scheme in view of its very low return of 0.06% and the uncertainty of getting any betterment fee from the ryots - vide Collector's letter No. D.Dis. C.23169/52 dated 22.1.53 (copy enclosed).

2. On examining the proposals in this office, it was found defective and so the Superintending Engineer has been asked to examine the alternative of shifting the site of the dam somewhat lower down into flatter country where the same storage could be had with a view to effect considerable savings in cost and send a report which is awaited. On receipt of Superintending Engineer's reply, a further report will be sent to Government.

IRRIGATION - Major - Kasargod Taluk - Provision of irrigation facilities - Construction of a dam across the stream Kutat Thodu - Proposals.

Ref. 1. D5. 134/52 dt. 6-8-52 from the Superintending Engineer, Coimbatore Circle.
2. Your No. 2671/50 B.19 dated 24-12-1952.

I enclose a copy of the Puttur Revenue Divisional Officer's report L.Dis. 8718/52 dated 11-1-1952. While endorsing his remarks, I have to add that in my opinion instead of spending so much on one scheme, there is a possibility in this district of executing from the same funds various small schemes costing less than about ½ a lakh each, the yield from which will be much greater from the Grow More Food and Financial points of view. For the various reasons stated by the Revenue Divisional Officer, I recommend that the scheme may be dropped.

Copy of L.Dis. 8718/52 dated 11-1-1953 from the Revenue Divisional Officer, Puttur.

IRRIGATION - South Kanara District - Grow More Food - Provision of irrigation facilities - Timiri reservoir Scheme - Administrative and financial aspects - Report submitted.

Ref: Collector's Ref.C.No. 23169/52 F.P.I dated 24-9-1952.

The Themiri Reservoir scheme consists of the construction of a dam across the stream Kutat Thodu at a place about 500' downstream of the junction of the two thodus that form the Kutat Thodu at Nallikan Kandam. The two streams originate on either side of a hill in R.S.59-1. They meet each other close to the plots R.S.Nos. 59.10 and 62.2. The combined stream flows downwards south to the plains and joins the channel running down from the east through the plot R.S.No. 61.1. The plot R.S. 61.1 is on a raised level and forms a separate hill valley. The sources of these streams have an abundant supply of spring water, which is unfailing even in summer. The lands lying between the plot R.S.61.1 and the proposed dam site would be submerged under the water. The waterspread area contains cocoanut trees, cashew trees, pepper gardens and a few houses along with about 14 acres of wet cultivable lands. These lands have been proposed ~~for~~ for acquisition by the P.W. Department. The lands to be benefitted by the scheme are situated in Chervathur and Thimiri villages. The total ayacut area to be benefitted in the two villages comes to about 1060 acresof which II crop is now grown on an extent of about 200 acres. When the reservoir is constructed the whole extent of 1060 acres can be cultivated with a II crop. The area of lands that can newly be brought under cultivation thus comes to 860 acres of II crop and the additional yield expected from this extent is 280 tons of rice costing Rs. 70,000-0-0 at the rate of Rs. 250/- per ton.

2. The scheme is feasible from an Administrative point of view. All the lands included in the ayacut except 100.30 acres stand registered as wet lands at present. No additional revenue, is therefore, expected on these lands. By conversion of 100.30 acres of dry lands into wet, the Government may derive about Rs. 218-12-0 as additional assessment. At the rate of Rs. 5/- per acre as proposed by the P.W. Department. The Government may derive Rs. 4300-0-0 as water tax. The betterment fee at Rs. 100/- per acre works at Rs.86,000/- if that is to be levied. But the proposals of the P.W. Department do not contemplate the collection of a betterment fee in this case. The financial aspect on these incomes is worked out below.

Total estimate of the scheme	Rs. 79,78,715-0-0
Deduct betterment fee, if collected.	Rs. 86,000-0-0
Balance	Rs. 78,92,715-0-0
Total income per year	Rs. 4,518-12-0
Percentage return	$\frac{4,518\text{-}12\text{-}0}{78,92,715\text{-}0\text{-}0} \times 100$
	= 0.06%.

II

Copy of L.Dis. 8718/52 dated 11-1-1953 from the Revenue Divisional Officer, Puttur.

IRRIGATION - South Kanara District - Grow More Food - Provision of irrigation facilities - Timiri reservoir Scheme - Administrative and financial aspects - Report submitted.

Ref: Collector's Ref.C.No. 23169/52 F.P.I dated 24-9-1952.

The Themiri Reservoir scheme consists of the construction of a dam across the stream Kutat Thodu at a place about 500' downstream of the junction of the two thodus that form the Kutat Thodu at Nallikan Kandam. The two streams originate on either side of a hill in R.S.59-1. They meet each other close to the plots R.S.Nos. 59.10 and 62.2. The combined stream flows downwards south to the plains and joins the channel running down from the east through the plot R.S.No. 61.1. The plot R.S. 61.1 is on a raised level and forms a separate hill valley. The sources of these streams have an abundant supply of spring water, which is unfailing even in summer. The lands lying between the plot R.S.61.1 and the proposed dam site would be submerged under the water. The water spread area contains cocoanut trees, cashew trees, pepper gardens and a few houses along with about 14 acres of wet cultivable lands. These lands have been proposed ~~for acquisition~~ for acquisition by the P.W. Department. The lands to be benefitted by the scheme are situated in Chervathur and Thimiri villages. The total ayacut area to be benefitted in the two villages comes to about 1060 acresof which II crop is now grown on an extent of about 200 acres. When the reservoir is constructed the whole extent of 1060 acres can be cultivated with a II crop. The area of lands that can newly be brought under cultivation thus comes to 860 acres of II crop and the additional yield expected from this extent is 280 tons of rice costing Rs. 70,000-0-0 at the rate of Rs. 250/- per ton.

2. The scheme is feasible from an Administrative point of view. All the lands included in the ayacut except 100.30 acres stand registered as wet lands at present. No additional revenue, is therefore, expected on these lands. By conversion of 100.30 acres of dry lands into wet, the Government may derive about Rs. 218-12-0 as additional assessment. At the rate of Rs. 5/- per acre as proposed by the P.W. Department. The Government may derive Rs. 4300-0-0 as water tax. The betterment fee at Rs. 100/- per acre works at Rs.86,000/- if that is to be levied. But the proposals of the P.W. Department do not contemplate the collection of a betterment fee in this case. The financial aspect on these incomes is worked out below.

Total estimate of the scheme	Rs. 79,78,715-0-0
Deduct betterment fee, if collected.	Rs. 86,000-0-0
Balance	Rs. 78,92,715-0-0
Total income per year	Rs. 4,618-12-0
Percentage return	$\frac{4,618\text{-}12\text{-}0}{78,92,715\text{-}0\text{-}0} \times 100$
	= 0.06%

3. The financial return from the scheme is thus 0.06%. From financial point of view the scheme is not worth undertaking. The Deputy Tahsildar, Hosdrug reports that even the ryots doubt whether the benefit derived from the scheme would be commensurate with the huge cost involved. After all the additional yield expected from the scheme is about 280 tons and the report of the Superintending Engineer shows that high water table gives better scope for cheap lift irrigation which the ryots are doing even now. The ryots also say that they cannot give any promise now regarding any betterment fee or water tax to be paid by them unless they actually begin to enjoy any benefit from this scheme. In these circumstances the scheme may be dropped. The Statements in forms I and II are enclosed.

4. The preliminary report of the Superintending Engineer with the estimate and Collector's office file D.Dis. 28272/49 dated 12-4-50 are herewith resubmitted.

Statement No. I.

1. Total cost of the scheme including direct and indirect charges.	Rs. 79,78,715--0--0
2. Area to be benefitted	860 acres for II crop
3. Gross additional revenue	Rs. 4518-12-0
	Rs. 4800-0-0 Water tax 218-12-0 assessment.
4. Additional yield	280 tons of rice.
5. Subsidy from Government of India	Nil

/True copy/

Statement No. II.

1. Total cost of the scheme including direct and indirect charges.	Rs. 79,78,715-0-0
2. (a) Government of India's share	Nil
(b) State Government's share	79,78,715-0-0
3. Acreage to be brought under additional cultivation	860 acres
4. No. of works completed	---
5. Extra food expected	280 tons of rice
6. Area which the scheme will benefit	1060 acres
7. Duration of the scheme	2 years
8. Results achieved under the previous year's scheme	---

Note: The area shown against col. 6 includes the area benefitted by the channel at present without the dam i.e. an extent of 200 acres, is being raised with II crop even now.

ASSISTANT SECRETARY TO GOVT. PUBLIC WORKS DEPT. 16 JUN 1953

No.2671/50-B-27 dated 8th June 53

Sir,

Sub:- Irrigation - South Kanara District - Hosdrug sub taluk - Timiri village - Timiri reservoir scheme - further report - submitted-

Ref:- 1) My letter No.2671/50-B-25 dated 16-4-53
2) -do- 2689/51-B-17 dated 21-5-53

In continuation of my letters cited I have to state that shifting the site of the dam lower down will entail submersion of valuable lands that result in extra cost in land acquisition and reduction of food value to the extent of submersion. The scheme is very costly and unproductive and it does not satisfy the criteria fixed by Government in G.O.Ms.No.5346 PW d/30-12-52. Further the Collector of South Kanara has recommended to drop the scheme. As further examination of the scheme has confirmed the inadequacy of the scheme to satisfy the financial criteria I recommend that this scheme may be dropped.

Copy of L.Dis.8713/52 dated 11-1-1953 from the Revenue Divisional Officer, Puttur.

Sub: IRRIGATION - South Kanara District - Grow More Food - Provision of irrigation facilities - Timiri Reservoir Scheme - Administrative and financial aspects - Report - Submitted.

Ref: Collector's reference C/23169/52 F.P.I dated 24-9-1952.

The Thimiri Reservoir Scheme consists of the construction of dam across the stream Kutat Thodu at a place about 500' down stream of the junction of the two thodus that form the Kutat Thodu at Nallikan Kandam. The two streams originate on either side of a hill in R.S. 59-1. They meet each other close to the plots R.S.Nos. 59, 10 and 62-2. The combined stream flows downwards south to the plains and joins the channel running down from the east through the plot R.S.No. 61-1. The plot R.S.No. 61-1 is on a raised level and forms a separate hill valley. The sources of these streams have an abundant supply of spring water, which is unfailing even in summer. The lands lying between the plot R.S.No.61-1 and the proposed dam site would be submerged under the water. This water spread area contains cocoanut trees, cashew trees, pepper gardens and a few houses along with about 14 acres of wet cultivable lands. These lands have been proposed for acquisition by the Public Works Department. The lands to be benefitted by the scheme are situated in Chervathur and Thimiri villages. The total ayacut area to be benefitted in the two villages comes to about 1,060 acres of which II crop is now grown on an extent of about 200 acres. When the reservoir is constructed the whole extent of 1,060 acres can be cultivated with a II crop. The area of lands than can newly be brought under cultivation thus comes to 860 acres of II crop and an additional yield expected from this extent is 280 tons of rice costing Rs. 70,000-0-0 at the rate of Rs. 250/- per ton.

2. The scheme is feasible from an Administrative point of view. All the lands included in the ayacut except 100.30 acres stand registered as wet lands at present. No,additional revenue is, therefore expected on these lands. By conversion of 100.30 acres of dry lands into wet, the Government may derive about Rs. 218-12-0 as additional assessment. At the rate of Rs. 5Ø- per acre as proposed by the Public Works Department. The Government may derive Rs. 4,300/- as water tax. The betterment fee at Rs. 100/- per acre works at Rs. 86,000/- if that is to be levied, But the proposals of the Public Works Department to dot contemplate the collection of a betterment fee in this case. The financial aspect of these is worked out below.

Total estimate of the scheme:	Rs. 79,78,715 0 0
Deduct betterment fee, if collected:	Rs. 86,000 0 0
Balance:	Rs. 78,92,715 0 0
Total income per year:-	Rs. 4,518 12 0
Percentage return:	Rs. 4,518 12 0 x 100
	Rs. 78,92,715 0 0
	= 0.06%

Rep 24/1

3. The financial return fro.. the scheme is thus 0.06%. From financial point of view the scheme is not worth undertaking. The Deputy Tahsildar, Nasdrug reports that even the ryots doubt whether the benefit derived fro. the scheme would be commensurate with the huge /all/ cost involved. After/the additional yield expected fro. the scheme is about 280 tons and the report of the Superintending Engineer shows that high water table given better scope for cheap lift irrigation which the ryots are doing even now. The ryots also say they cannot given any promise now regarding any betterment fee or water tax to be paid by them unless the, actually begin to enjoy any benefit from this scheme. In these circumstances the scheme may be dropped. The Statement in forms I and II are enclosed.

4. The preliminary report of the Superintending Engineer, with the estimate and Collector's office D.Dis.28272/49 dated 12-4-1950 are herewith resubmitted.

/True Copy/

STATEMENT NO. I

1.	Total cost of the scheme including direct and indirect charges.	Rs. 79,78,715 0 0
2.	Area to be benefitted.	860 acres for II crop.
3.	Gross additional revenue.	Rs. 4,518 12 0
		Rs. 4,300 0 0 Water Tax. Rs. 218 12 0 Assessment.
4.	Additional yield.	280 tons of rice.
5.	Subsidy from Government of India.	Nil.

/True Copy/

STATEMENT NO. II

1.	Total cost of the scheme including direct and indirect charges.	Rs. 79,78,715 0 0
2 (c)	Government of India's share:	Nil.
(b)	State Government's share:	Rs. 79,78,715 0 0
3.	Acreage to be brought under additional cultivation:	860 acres.
4.	Number of works completed.	---------
5.	Extra food expected.	280 tons of rice.
6.	Area which the scheme will benefitted.	1,060 acres.
7.	Duration of the scheme:	2 years.
8.	Results achieved under the previous years' scheme:	

NOTE: The area shown against Col. 6 includes the area benefitted by the channel at present without the dam i.e., an extent of 200 acres is being raised with II crop even now.

COPY of letter No. 2671/50-B-27 dated 8th June 1953 from the Chief Engineer (Irrigation) Chepauk, Madras to the Secretary to Government Public Works Department, Fort St. George, Madras.

.....

Sub: IRRIGATION - South Kanara District - Hosdrug Sub Talu' Timiri Village - Timiri Reservoir Scheme - further report - Submitted.

Ref: 1. My letter No. 2671/50-B-25 dated 16-4-1953,

2. -do- 2689/51-B-17 dated 21-5-1953.

.....

In continuation of my letters cited I have to state that shifting the site of the dam lower down will entail submersion of valuable lands that result in extra cost in land acquisition and reduction of food value to the extent of submersion. The scheme is very costly and unproductive and it does not satisfy the criteria fixed by Government in G.O.Ms.No. 5346 Public Works Department, dated 30-12-1952. Further the Collector of South Kanara has recommended to drop the scheme. As further examination of the scheme has confirmed the inadequacy of the scheme to satisfy the financial criteria I recommend that this scheme may be dropped.

P.W.D.(J.I.).

Sub:-Irrigation--South Kanara District--Hosdrug Sub taluk--Timiri village--Timiri reservoir scheme--Report.

Ref:-From the C.E.(I).II. Lr. Nos. 2671/50.B.25. dated 16-4-1953 and 2671/50-B.27 d/8-6-53.
From the Board of Revenue, B.P.Rt.No.5393 dated 22-6-1953.

In 1945, it was suggested to the C.E.(I) (at the instance of Mr. E.M.Gawn, Adviser to H.E.) that a great deal could be done to assist irrigation of second crop lands if across small streams a steel frame work could be put up which could carry a foot bridge and which could be used for constructing the dam for second crop irrigation as soon as the flow in the stream permitted. The C.E.(I) considered that the suggestion was not quite suitable as a general case but that specific cases might be examined on their merits and the Board of Revenue agreed with the C.E.(I). Accordingly the Board was asked to instruct the Collector of South Kanara to suggest cases for putting up steel frame work across streams with estimates of cost in each case.

In August 1947, the Collector reported that the E.E. informed him that out of 8 schemes selected for investigation, estimates in respect of Herekere tank Chandra Madaga tank and Shiriya river schemes were submitted to the S.E. and that the detailed investigation in respect of the remaining five schemes would be taken up after the monsoon was over. These five schemes were:-

(1) Kudarabettu dam across the Mutki river in Mangalore Taluk.

(2) Mundkur dam across the Mulki river in Mangalore Taluk.

(3) Formation of a reservoir in Timiri village, Hosur Sub-taluk of Kasargod taluk.

(4) Diversion of water by channels from Payaswani river, Kasargod taluk, and

(5) Angadimogru dam in Kasargod taluk. ~~The Board~~ The Board reported in June 1948 that out of the above five schemes item (4) was dropped as it was found not feasible and that as it would take a long time to have the remaining schemes completely investigated the Collector was being asked to submit a report by 1-12-48. Again in May 1949, the Collector submitted a report recommending that items (1) and (2) at 'A' above viz. Kudarbettu dam and Mundkur dam across the Mulki river in Mangalore Taluk be dropped in view of the then pending civil litigation over the construction of a dam at Mundkur, ~~as~~ and in view of the fact that there was already a dam at Palimar across Mulky annually constructed by the ryots themselves and the E.E. reported that it would not be possible to have irrigation under an additional dam from the same flow. With regard to Augadinogo dam in Kasaragod taluk item (5) at 'A' above the E.E. reported that there would be no flow during II crop when the Shiriya anicut at Dadur (which was already under execution) and Shiriya anicut at Bombrana (were put up and hence it was also not feasible. As regards item (5) at A on p 1 above, the Board of Revenue promised to send a further report. In April 1953, the C.E.(I) at the instance of the Board reported that an estimate amounting to Rs.61,37,250/- for works and Rs.79,78,715/- inclusive of direct and indirect charges (together with a preliminary report) for the formation of a reservoir by building a dam across the Kutat thodu in Timiri Village of Hosdrug sub-taluk of Kasargod Taluk, South Kanara District, (item (3) at 'A' on p above) to bring under second crop cultivation an extent of 1060 acres ~~was received from the S.E.~~ He stated that the Collector of South Kanara did not recommend the scheme in view of its very low return of 0.06% and the uncertainty of getting any betterment fee from the ryots. The C.E. added that as the ~~case~~ proposals had been found defective on examination, the S.E. had been asked to examine the alternative of shifting the site of the dam somewhat lower down into flatter country where the

the same storage could be had with a view to effect considerable savings in cost and send a report. The C.E. has now reported that shifting the site of the dam lower down will entail submersion of valuable lands ~~that result in extra cost in~~ resulting in increase of expenditure under land acquisition and reduction of food value to the extent of submersion. He states that the scheme is very costly and unproductive and does not satisfy the criteria fixed by the Government in G.O.No.5346 P.W. dated 30-12-1952. The Collector of South Kanara also does not recommend the scheme in view of its very low return of 0.06% and the uncertainity of getting any betterment fee from the ryots. As further examination of the scheme has confirmed that the scheme does not satisfy the financial criteria, the C.E. ~~also~~ recommends that the scheme may be dropped. The Board of Revenue ~~also~~ has agreed with the Collector and the C.E.(P) and has recommended dropping the scheme as it fails to satisfy the conditions laid down in G.O.No.5346 P.W. dated 30-12-1952.

In the circumstances reported, the scheme may be dropped.
